

“Transferring knowledge about the TSMO practice around the country”

---

**CTSO TSMO Roundtable Webinar Series:  
Best Practices for TSMO Training Programs at all Levels of the  
Workforce**

**Date: December 9, 2020**

# Overview & History

- AASHTO's Subcommittee on Operations (Committee on Transportation Systems Operations--CTSO) has identified holding one or more TSMO Roundtables as one of its priorities for 2020. The intent is to focus on bread 'n butter TSMO topics that will be feed by CTSO membership. It is envisioned that these webinars will become a reoccurring opportunity for sharing best practices and facilitating discussion that supports the furtherance of TSMO.
- Beginning in 2016, AASHTO, NOCoE, and FHWA collaborated on a series of virtual roundtables to share emerging and best practices on TSMO program planning. The roundtables had the following Learning Objectives for participants:
  - Identify peer agencies that have developed TSMO Program Plans and/or integrated TSMO Program Plan elements into their existing plans and procedures
  - Identify common issues encountered and their potential remedies to TSMO Program Plans to help mainstream TSMO in an agency

# Previous Webinars

- The following roundtable webinars (hyperlinked to their NOCoE website resource page) were held (presenting agencies listed):
  - [Roundtable 1](#) (December 13, 2016)
