Engineer I

Master's student in mobility engineering with a focus on sustainable transportation, known for detail-oriented problem-solving and a passion for impactful, eco-friendly mobility solutions.

Professional Experience

Four Seasons Landscaping

7/2023 – 5/2024

Business Development

Drove sales and new client acquisition in varying asset classes ranging from cities, agencies, schools, and high-end residential

- Acted as a visionary in the landscaping industry, identifying growth opportunities and establishing new client connections.
- Managed over \$1 million in annual landscape maintenance contracts, ensuring high-quality service delivery and client satisfaction.
- Oversaw a team of 20 workers, both in the field and in the office, ensuring efficient operations and project completion.
- Developed and submitted government requests for proposals (RFPs) to expand the company's presence in the public sector, securing contracts for both maintenance and new construction projects.

RTI CONSULTING, INC.

01/2020 – 12/2022

Assistant Construction Manager

Managed a facility management team in the maintenance and improvement of residential and commercial projects for a family-owned construction business.

- Supported the management of temperature and humidity-controlled storage for sensitive film material, theaters and office spaces for two story and high-rise buildings.
- Deciphered contractor markups and coordinated job specifications, expectations, and agreement terms with clients.
- Compiled data and obtained price estimates from multiple contractors for a \$500K solar project.
- Restructured project specifications to achieve inspector approval for an upgraded vault sprinkler system.
- Managed past project documentation to provide accurate job specifications for future buildings.

INFINITE STUDIOS, Israel

09/2018 – 12/2019

Production Coordinator & Graphic Design Assistant

Served as a lead assistant for a small business design company specializing in game engines and movie graphics.

- Tested and provided feedback on design game engines and new photo editing app to diagnose feasibility of applications and setup for customers.
- Reviewed third party contracts and intellectual property rights to facilitate term agreements.

LUIS LABATON & PARTNERS, Israel

08/2014 – 03/2015

Drafter

Collaborated with a team of engineers to draft and revise architectural and structural plans for university buildings.

- Utilized CAD to generate drawings of section cuts to distribute to field contractors.
- Performed preliminary load calculations and extracted load calculations from rendering software.

Education

Masters of Science • University of California, Riverside: Mobility Engineer, Expected 2025 Summer
