

Delaware Department of Transportation Crowdsourcing Business Case

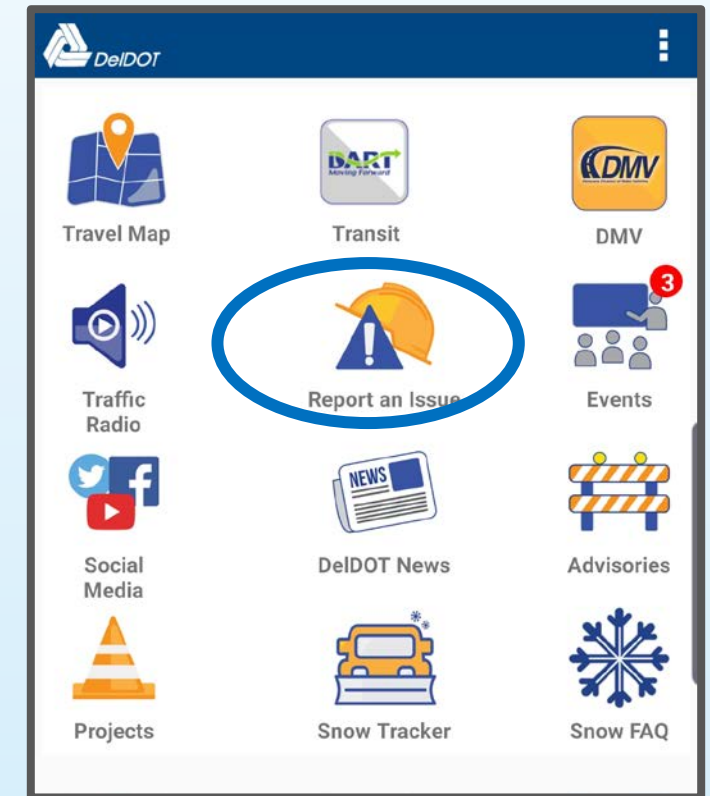

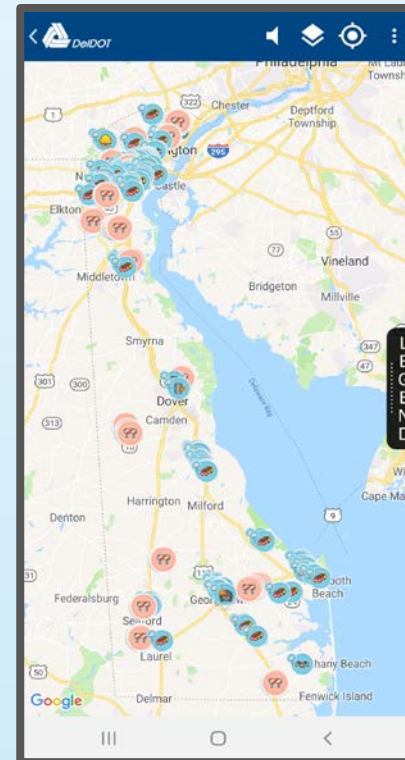

Gene Donaldson

Adventures in Crowdsourcing Webinar

October 22, 2020

Delaware Department of Transportation Crowdsource Activities

- DeIDOT App and DeIDOT Interactive Map
- Report a Road Condition
- Waze partner
- AI-ITMS ATCMTD Grant
- Other activities

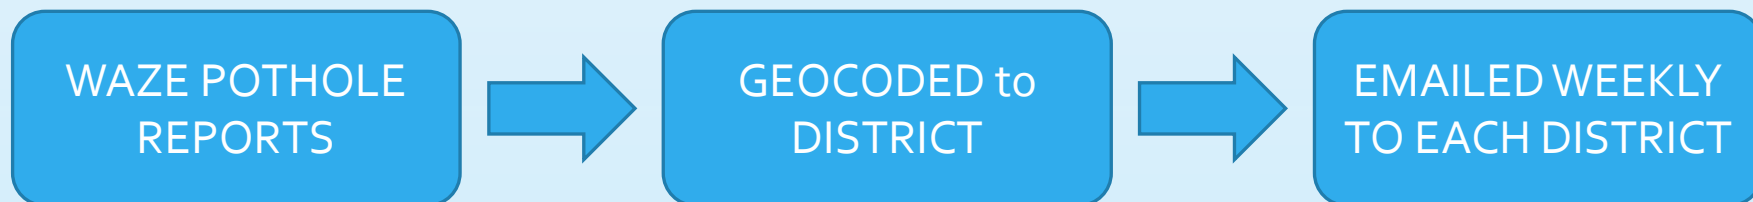

Source: Delaware Department of Transportation

Waze Partnership

Waze information is a layer on DelDOT App and DelDOT Interactive Map

Developed application to create **Waze pothole information lists** weekly to responsible DelDOT maintenance yards.

AI-ITMS ATCMTD Grant & Other Activities

AI-ITMS ATCMTD Grant

- Implement AI based predictive and adaptive enhancement to existing Integrated Transportation Management System.
- Implementing AI interface to Waze data and provide analytics and weighting of data as an automated input into AI-ITMS.
- Reviewing other crowd sourced data as possible inputs.

Other activities

- Planning to develop requirements for implementing location-based transportation management information pushed to users.
- Reviewing options to monitor public social media activity related to transportation system to increase awareness of concerns and issues.
