

Expanding TIM Training to the Volunteer Firefighter/EMT Community

- About the NVFC
- The volunteer fire service:
 - Comprises 70% of firefighters in the U.S.
 - Saves localities an estimated \$139.8 billion a year
 - Protects 1/3 of the U.S. population
 - Responds to a variety of emergencies, including traffic incidents

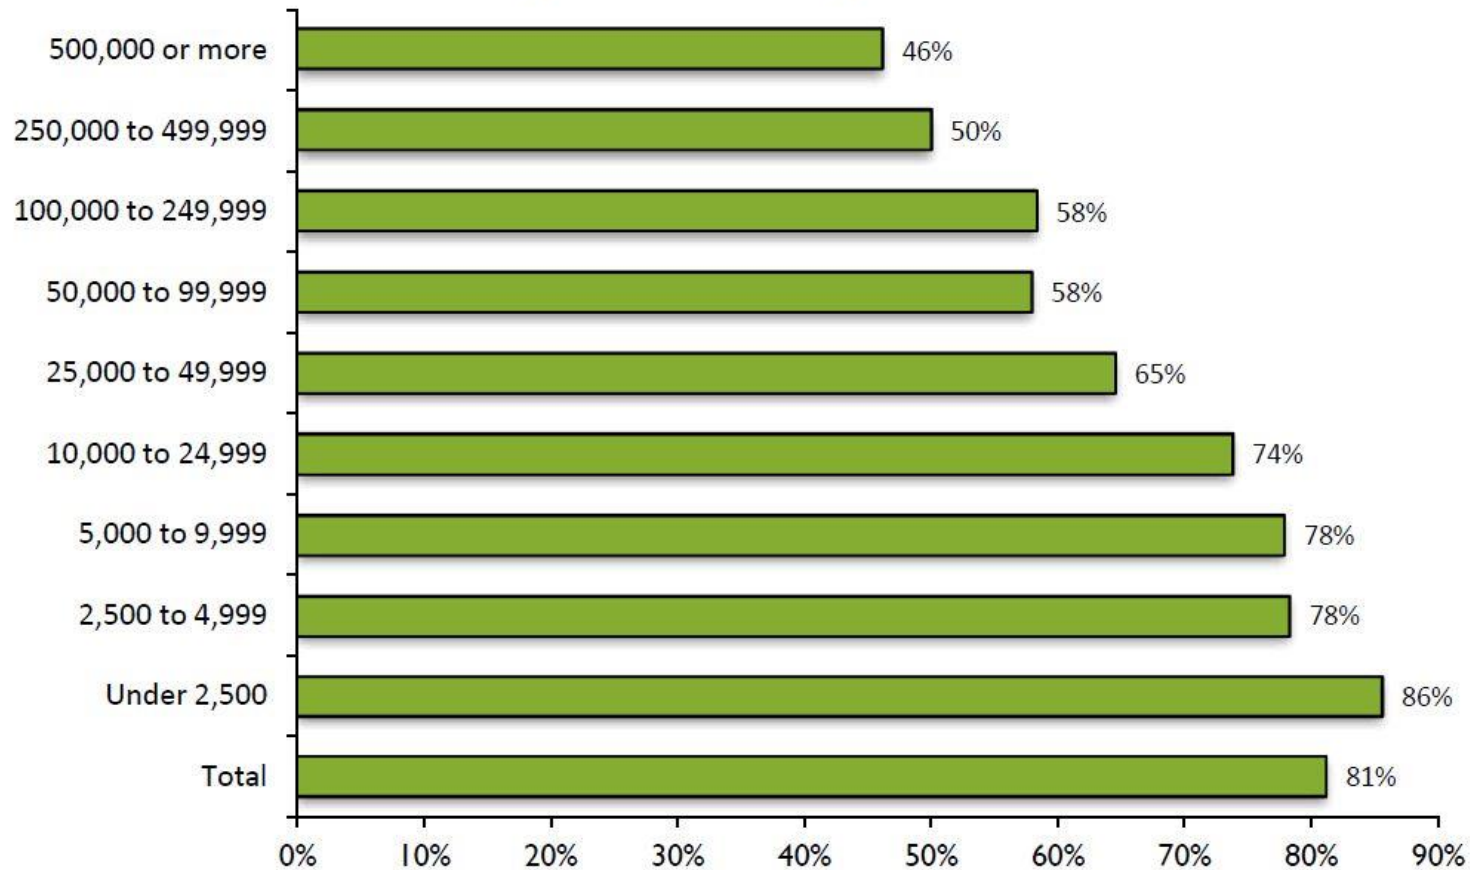

Statistics and Risk

- Estimated 6 million police-reported motor vehicle crashes resulting in 33,000 deaths and over two million injuries in 2014 (NHTSA)
- Emergency personnel – paid or volunteer – are responding to over 11 accidents every minute nationwide
- 89% of departments in communities with populations under 2,5000 perform active traffic control (NFPA)
- An average of five firefighters die every year in a struck by incident (NFPA)

The Need for Training

Figure 1-24. Need for Departments Performing Traffic Control: Percent with Personnel Who Are Not All Formally Trained by Size of Community for 2015

Fourth Needs Assessment of the U.S. Fire Service, NFPA, 2016

NFPA 1091

- Identifies the minimum job performance requirements (JPRs) for Traffic Control Incident Management Personnel
- Helps reduce the risks to response personnel and the public through proper traffic control training
- Crafted with three objectives:
 1. Responder safety
 2. Safe, quick clearance
 3. Prompt, reliable, interoperable communications
- Emphasis on the importance of partnerships and coordinated multidisciplinary processes

NVFC and DOT/FHWA

- Raising awareness in the volunteer fire and emergency service community
- FHWA's TIM train-the-trainer program provides an effective multidisciplinary approach
 - In-person workshops
 - Online training
- Visit www.nvfc.org/traffic-incident-management for information and resources
