

IT & Traffic Ops, Below the Lines

Presenters: Joe Kirk & Brad Freeze

The Odd Couple – History & Culture

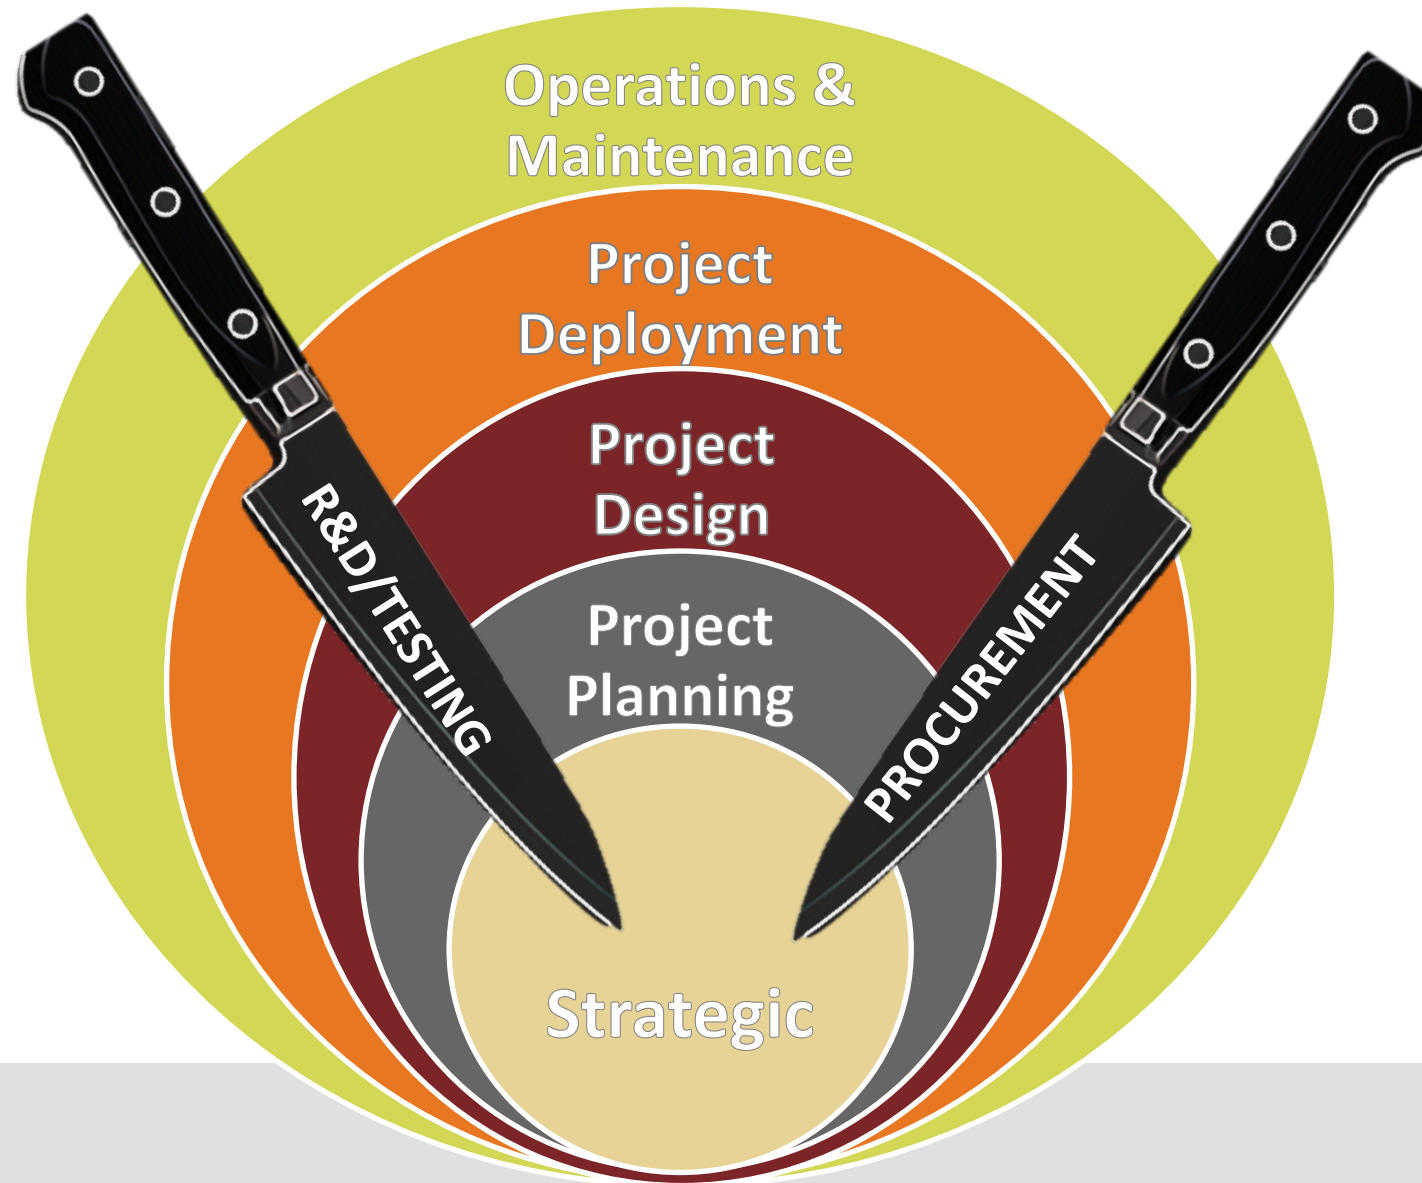

IT/Traffic Operations Internal Workshops

Workshop Goals:

1. Further develop working relationships between IT & Traffic Operations Staff
2. Establish a clear understanding of the roles, responsibilities and mission of IT & Traffic Operations with regards to how TDOT leverages existing and future technology to support a safe and efficient transportation system
3. Develop a framework that documents the roles and responsibilities of Traffic Ops & IT and establishes key work processes and communication networks needed to support the successful deployment, operations, and maintenance of existing and future transportation technologies.
4. Conduct a visioning session to align priorities for the next 5 to 10 years.

The 5 Layers of the IT/Traffic Operations Onion

Questions and Open Discussion
