AASHTO SICOP – Winter Maintenance Technical Service Program
National Strategic Winter Maintenance Plan

3-year cycle of strategic issues from member states

1: Explore optimal/adaptive snow plow route planning
2: Promote performance management for winter maintenance
3: Identify effective uses of Automated Vehicle Location (AVL) technologies for internal and external applications
4: Examine Connected and Automated Vehicle (CAV) technologies utilized in winter maintenance
5: Promote weather responsive traffic management to improve mobility and safety during weather events
6: Encourage liquid chemical use in winter operations
7: Evaluate winter operations techniques for use in moderate weather zones to improve resiliency
More Context on TSMO365

Episode 20: TSMO365 – Weather or not
Episode 22: EDC5 – Weather responsive management strategies
