

U.S. Department of Transportation
Federal Highway Administration

United States Department of Transportation (USDOT) Mobility Data Business Plan (DBP) and Assistance to States and Local Jurisdictions

Share Your Knowledge - Webinar

Walter During, PE
Transportation Specialist
Federal Highway Administration (FHWA)
Office of Operations

Date: June 8, 2021
Time: 1:30 PM to 3:00 PM (EST)

Discussion Agenda

1. Background
2. High-level overview of FHWA Mobility Data Business Plan Guide
3. Typical objectives and outcomes
4. Beneficiaries of workshops conducted to-date
4. Opportunities

USDOT Data Gaps White Paper

Gaps identified:

- Data gaps
- Coordination gaps
- Data standards and governance gaps

The recommendation:

- To develop, implement, and maintain a Data Business Plan

What is a Data Business Plan (DBP)?

A DBP is a plan for efficient use of people, processes, and technology. It links business objectives, programs, and processes to data systems, services, and products, and guides an agency in data management practices.

Mobility Data Coordination Group

Formal Designation of Mobility Data Coordination Group to coordinate on data issues:

- **Data gaps/overlaps in specific types of roadway mobility data**
 - Infrastructure/inventory
 - Roadway travel mobility data (speed/volume)
 - Climate data
 - Modal data
 - Data capture activities associated with research in wireless Connected Vehicle technologies sponsored by the Intelligent Transportations Systems Joint Program Office
- **Cross-cutting data management issues that impact all data types**
 - Data quality
 - Standards
 - Privacy/security

Benefits of Data Business Planning

Help local partners understand:

- What mobility data is being collected within their organizations and at the regional level
- How the data supports mobility planning, operations and performance measure activities
- Who is responsible for managing/updating the data

Help identify potential
duplicative data collection
efforts

Solidify working
relationships by identifying
how partner agencies
share and exchange
mobility data, both
internally and externally

Lead to more rapid,
targeted data
acquisitions and reduced
data
collection/management
costs in the future

Background

Multi-year effort at FHWA's Office of Transportation Operations

First developed and implemented best practices in data governance and management

Then developed a draft DBP guide to be shared with local, regional, and state agencies

Draft was tested, refined and finalized based on lessons learned from three pilots –

- Hillsborough MPO (Tampa area, Florida)
- Mid-America Regional Council (Kansas City area)
- Maryland DOT

Data Business Plan Guide Steps

1. Establish Needs and Objectives

2. Stakeholder Outreach

3. Data Assessment

4. Gap Assessment

5. Improvement Strategies

6. Data Governance Processes and Documents

7. Data Management Practices

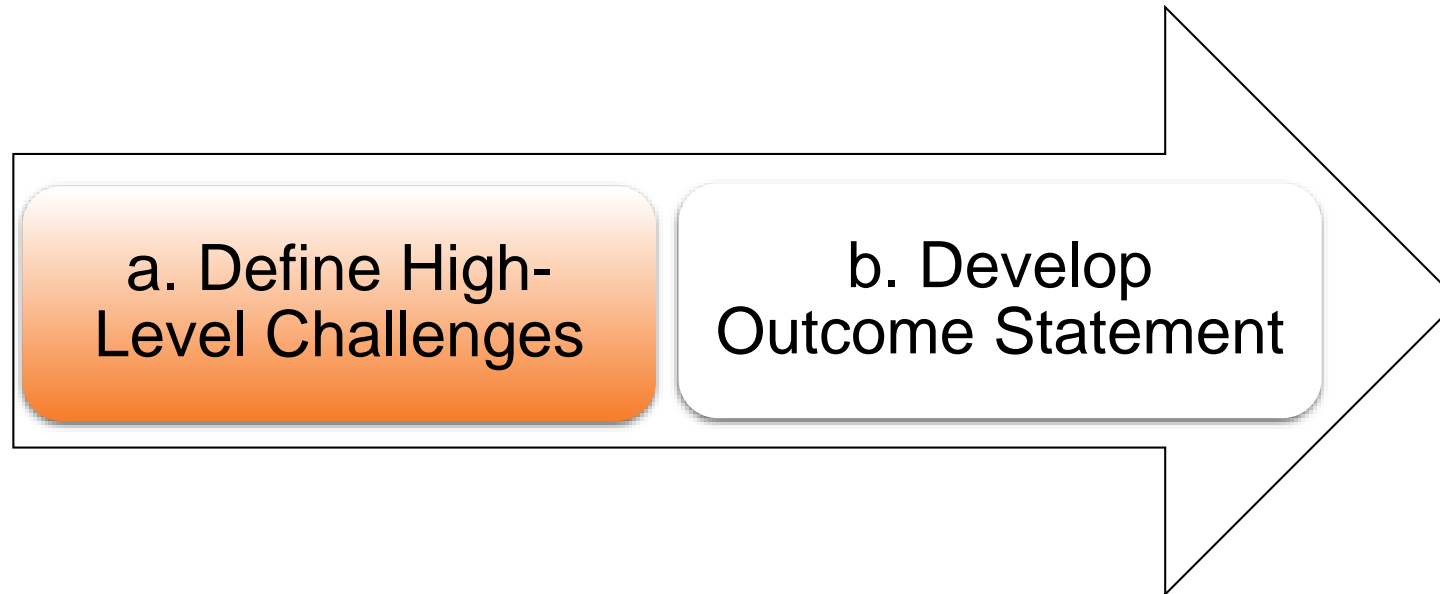

8. Develop Implementation Roadmap

9. Develop Data Business Plan

Step 1. Establish Need and Objectives

Step 1. Establish Need and Objectives

Step 1a. Define High Level Challenges

Data Systems

- Data Collection
- Duplicative Efforts
- Data Storage
- Data Quality
- Data Standards
- Data Integration
- Documentation
- System Access

Technology and Tools

- Software
- Hardware
- System Interfaces
- IT Compatibility
- Business Intelligence Tools
- Analytical Tools
- Knowledge Management
- Network Issues

Management and Governance

- Business Rules and Processes
- Data Management
- Data Governance
- Coordination Resource Availability
- Training Needs

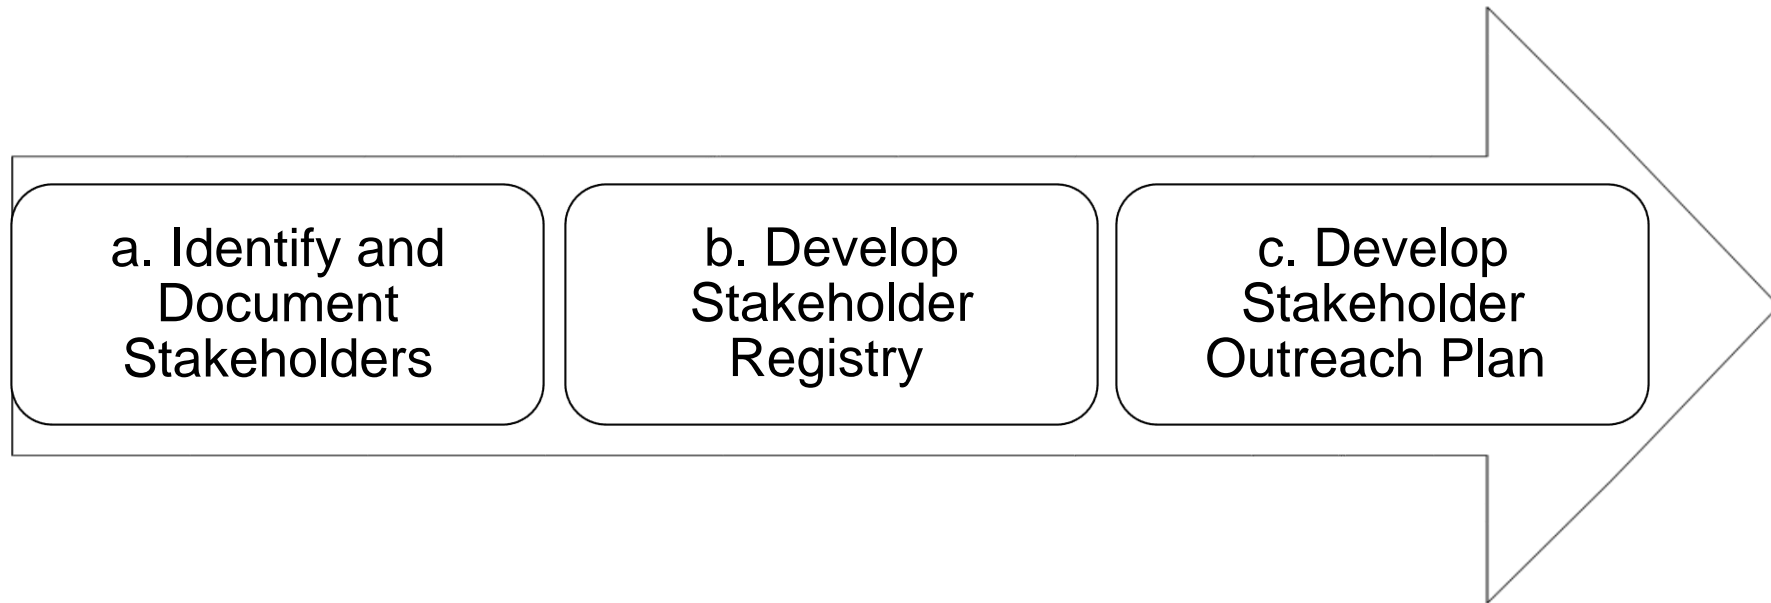

Step 1b. Develop Outcome Statement

Describes the results the DBP will achieve

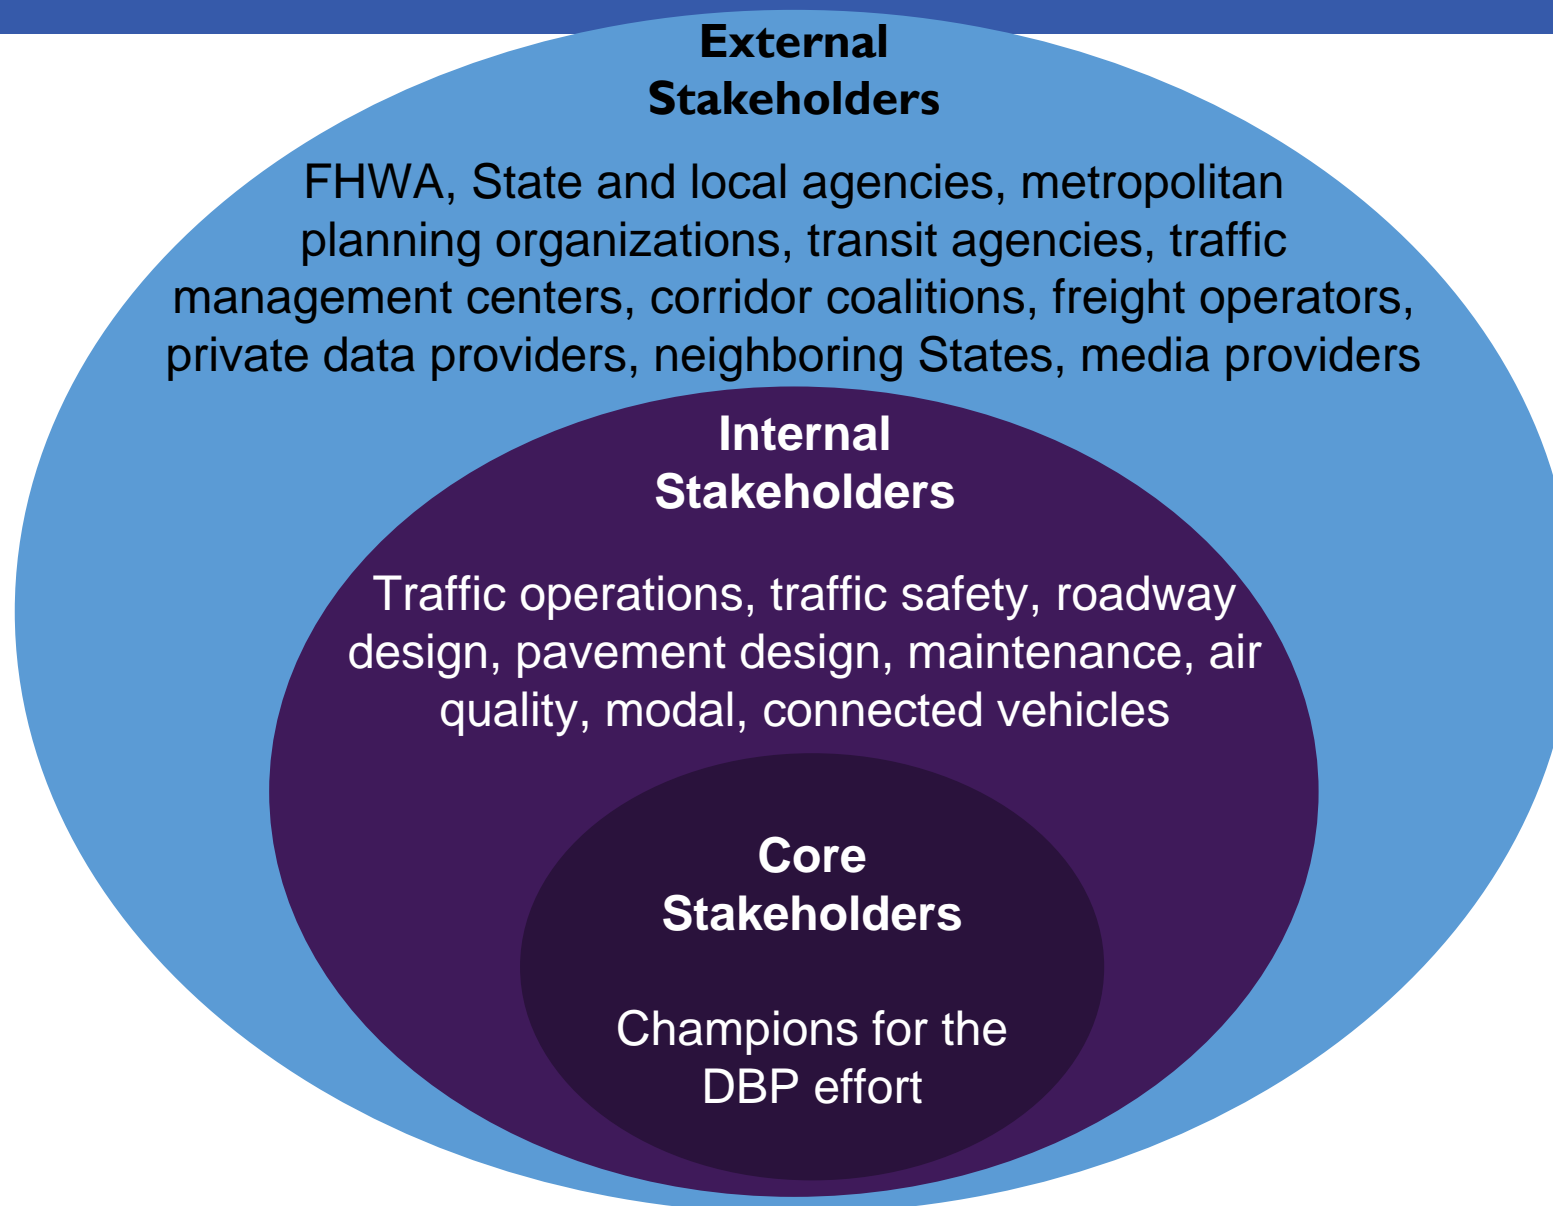

- Develop a **framework** for partner agencies to share mobility data for roadway users and freight within the region for planning purposes
- Develop a **process** for developing, collecting, calculating, and reporting on performance measures to support mobility in the region

Step 2. Stakeholder Outreach

Step 2. Stakeholder Outreach

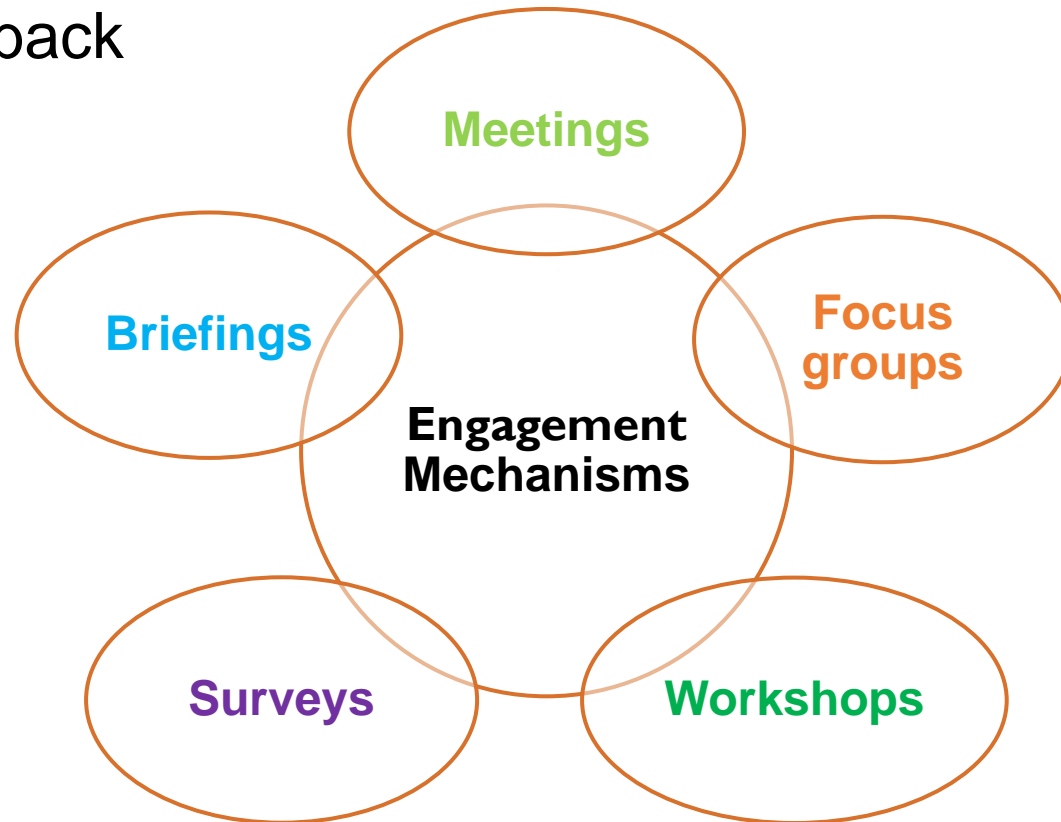

Step 2a. Identify and Document Stakeholders

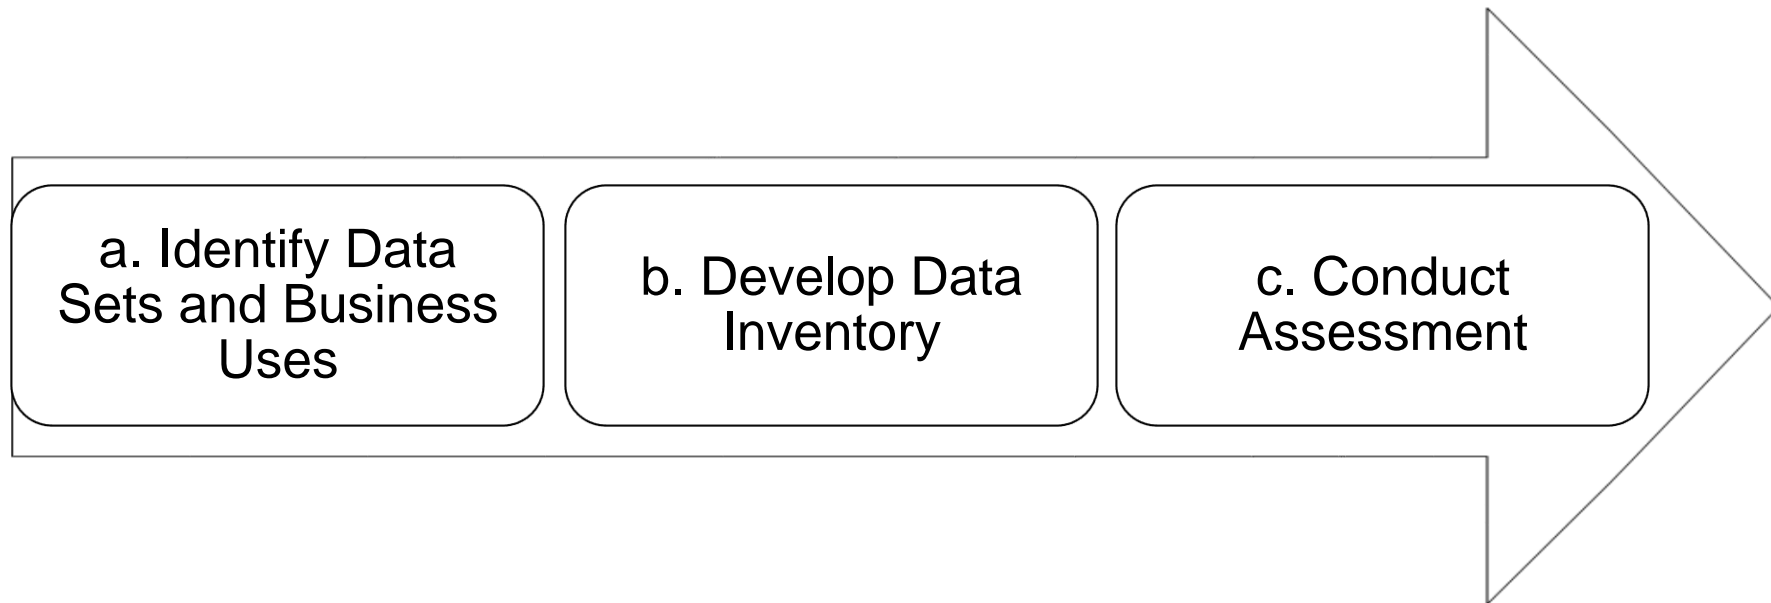

Step 2c. Develop Stakeholder Outreach Plan

- Stakeholder involvement in each step of DBP development
- Desired feedback

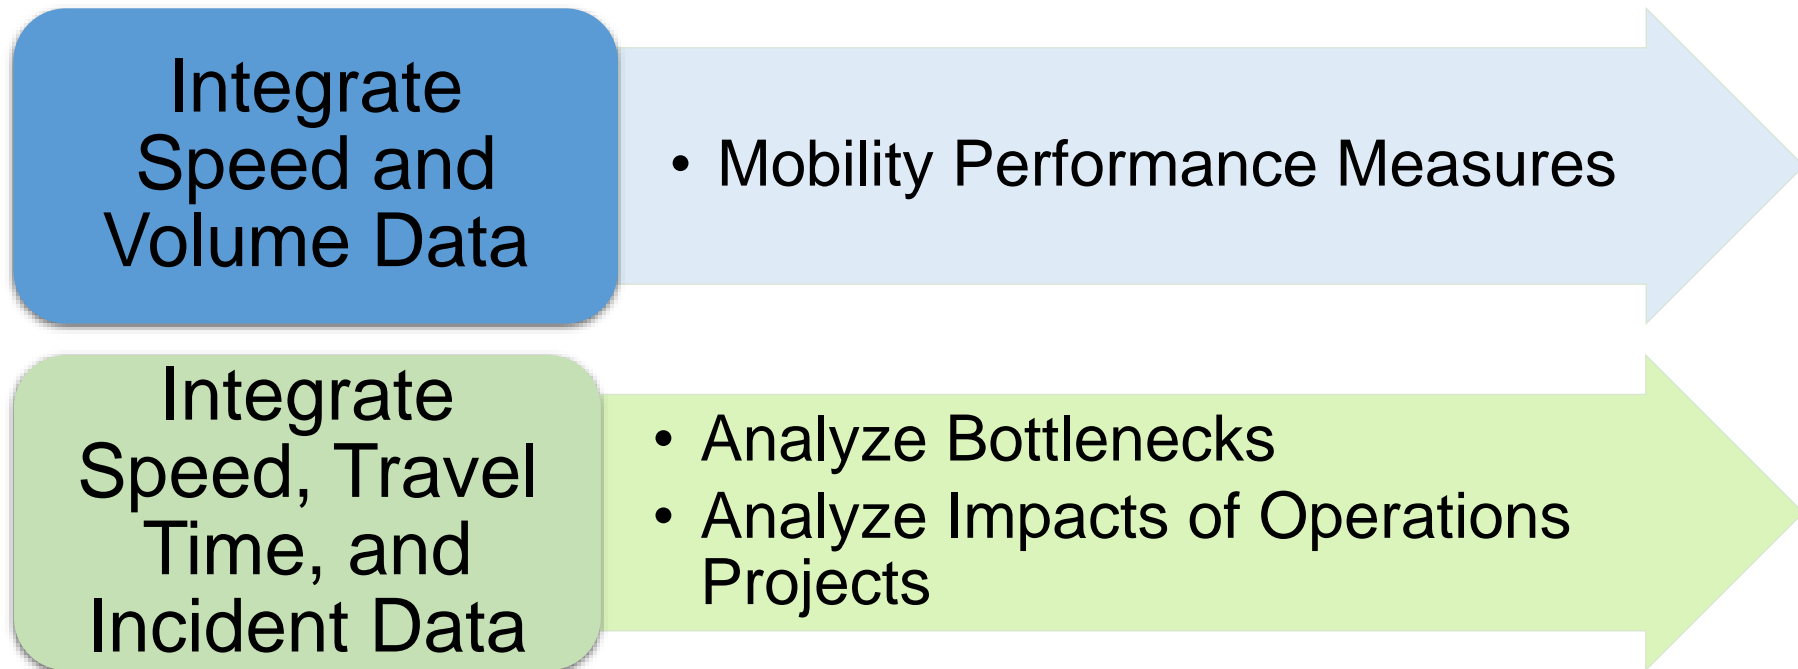

Step 3. Data Assessment

Step 3. Data Assessment

Step 3a. Identify Data Sets and Business Uses

Step 3b. Develop Data Inventory

- Increase knowledge of current and future mobility data collection activities in the region

Agency	Mobility Data	Data Source	Data Collection Method	Network Type	Geographic Boundary	Time Period	Purpose
County DOT	Speed Travel Time	Google Traffic / Waze	Crowd-Sourcing	Freeways Highways Arterials	Within County Boundary	Ongoing	Operations Planning
State DOT	Volume	Collected Internally	Count Stations	Freeways Highways	Within District Boundary	Ongoing Samples	Operations Planning Design

Step 3c. Conduct Assessment

- Assessment Areas

Data collection, management and technical standards

Data interoperability and expandability

Data storage and access

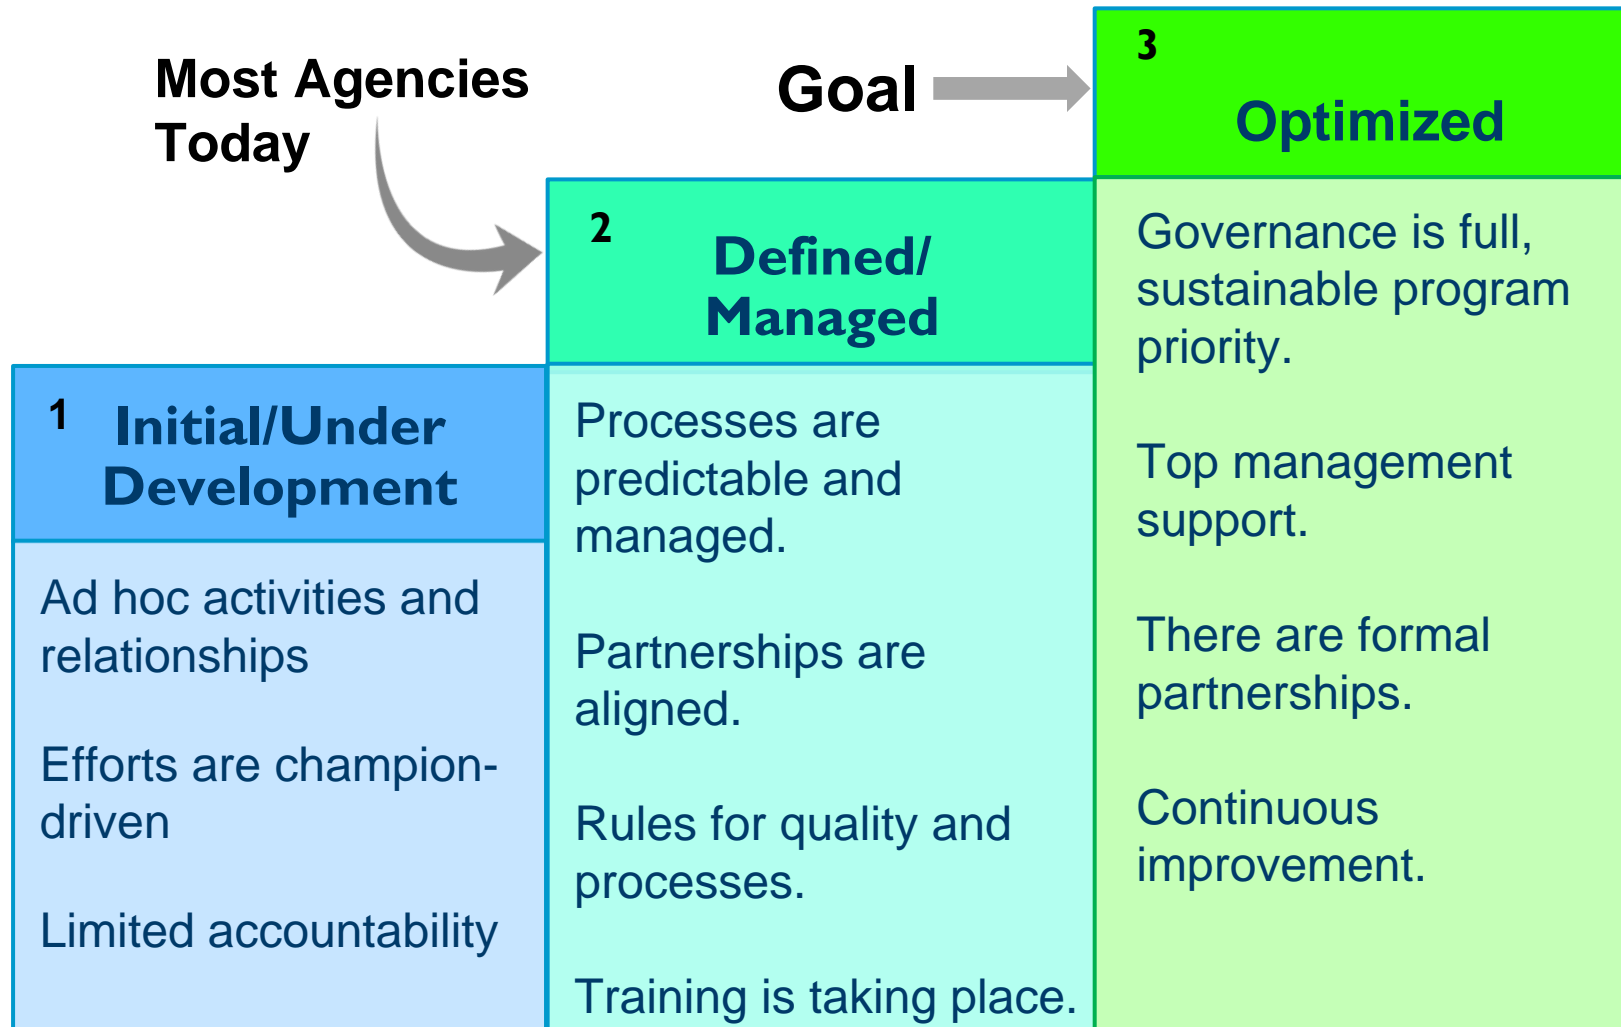

Technology and tools

Data governance, culture, and collaboration

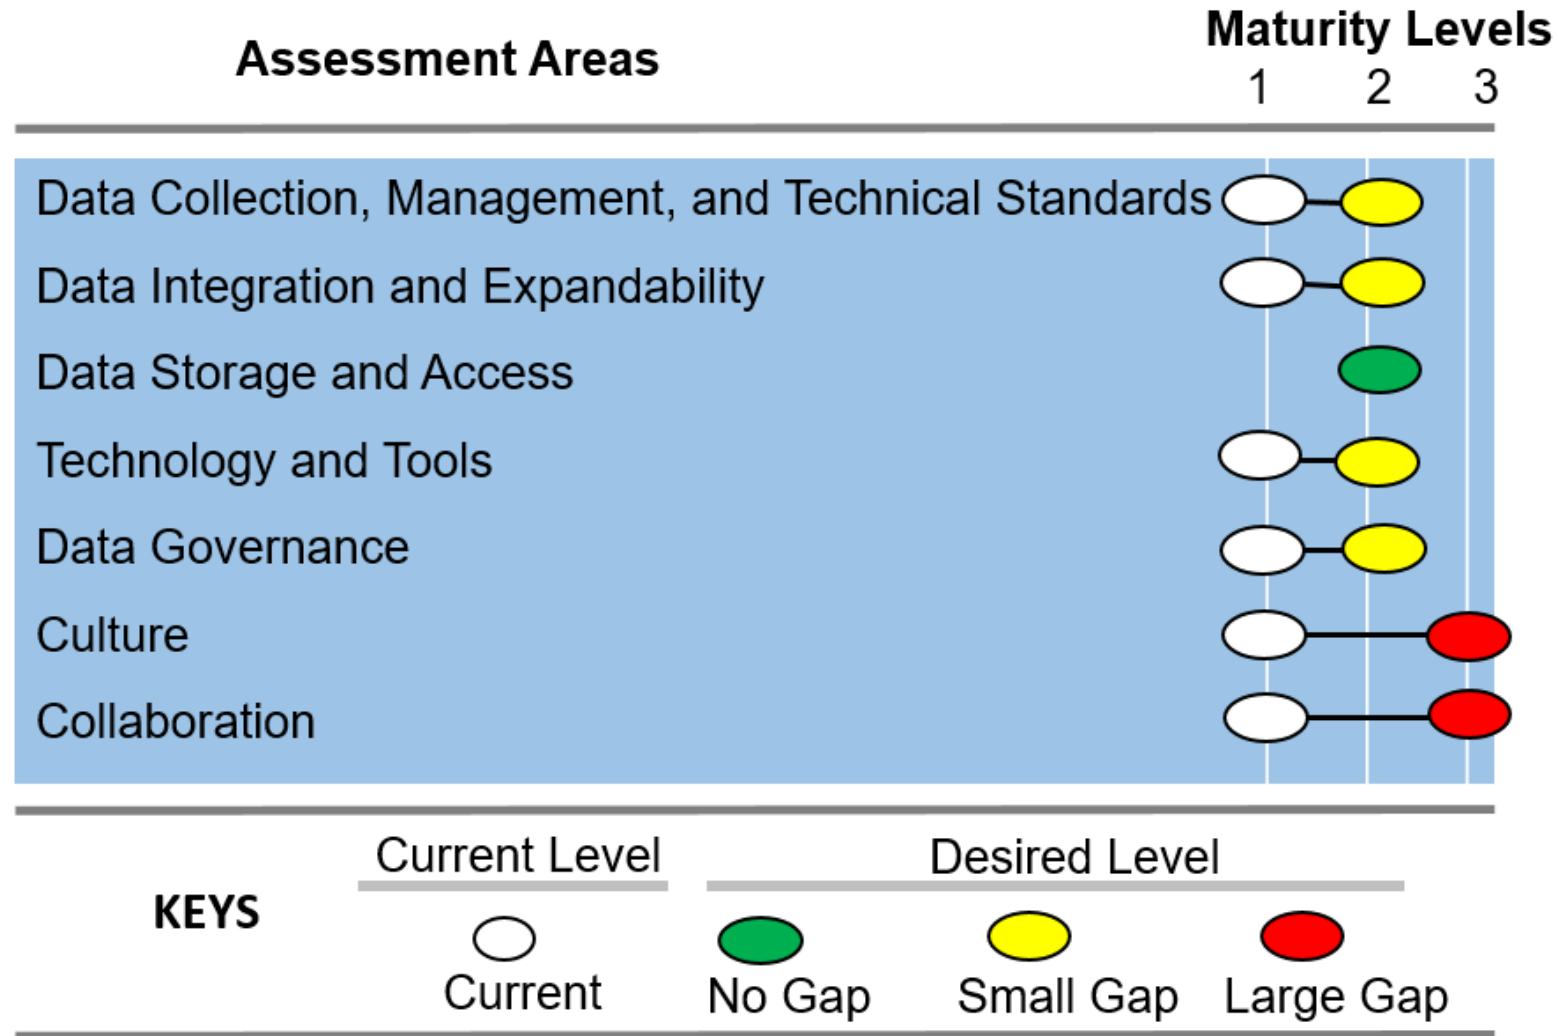

- Assess current level of maturity

- Data management maturity model

Step 3c. Conduct Assessment (Cont.)

Step 3c. Conduct Assessment (Cont.)

Source: Federal Highway Administration, FHWA-HOP-18-009

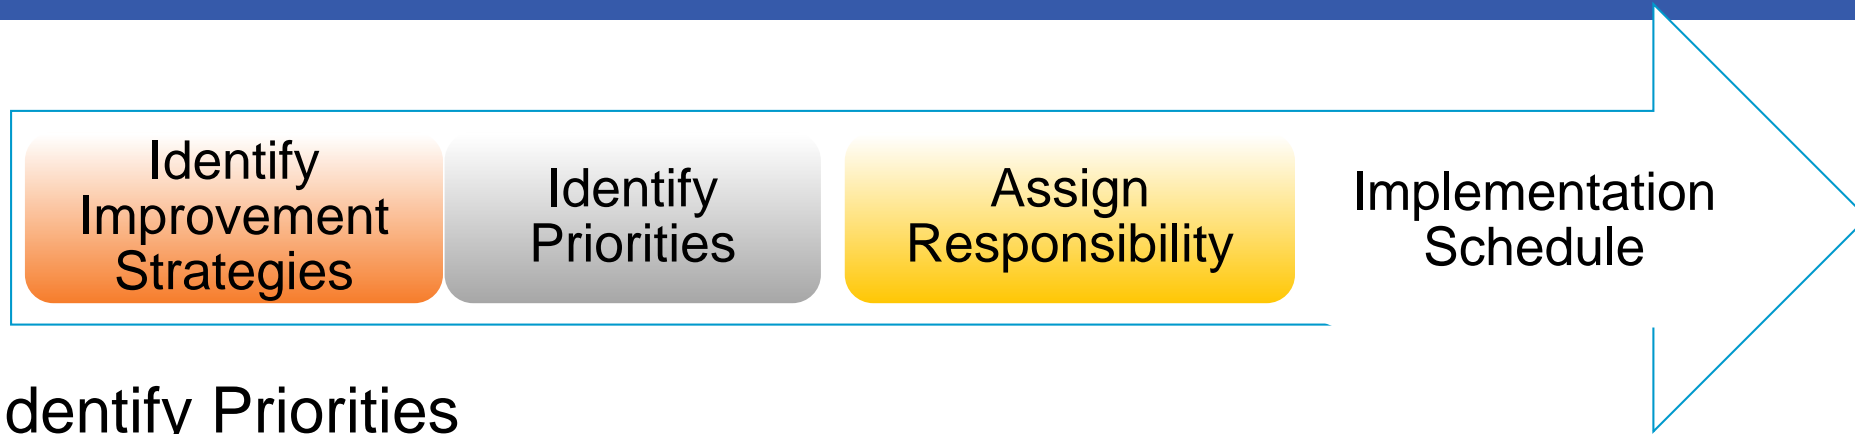

Step 4. Gap Assessment

Step 4. Gap Assessment

- Identify gaps and overlaps that exist in program activities:
 - **Data Systems:** Gaps related to data systems, data elements, data collection methods, duplicative data collection efforts, data storage environments, quality of data, data standards, data integration, data analysis, documentation, and system access
 - **Technology and Tools:** Gaps related to software, hardware, system interfaces, IT compatibility, business intelligence tools, analytical tools, knowledge management, and network issues
 - **Data Governance, Culture, and Collaboration:** Gaps related to business rules and processes, data management, data governance, coordination across business lines, resource availability, and training needs

Step 5. Improvement Strategies

Step 5. Improvement Strategies

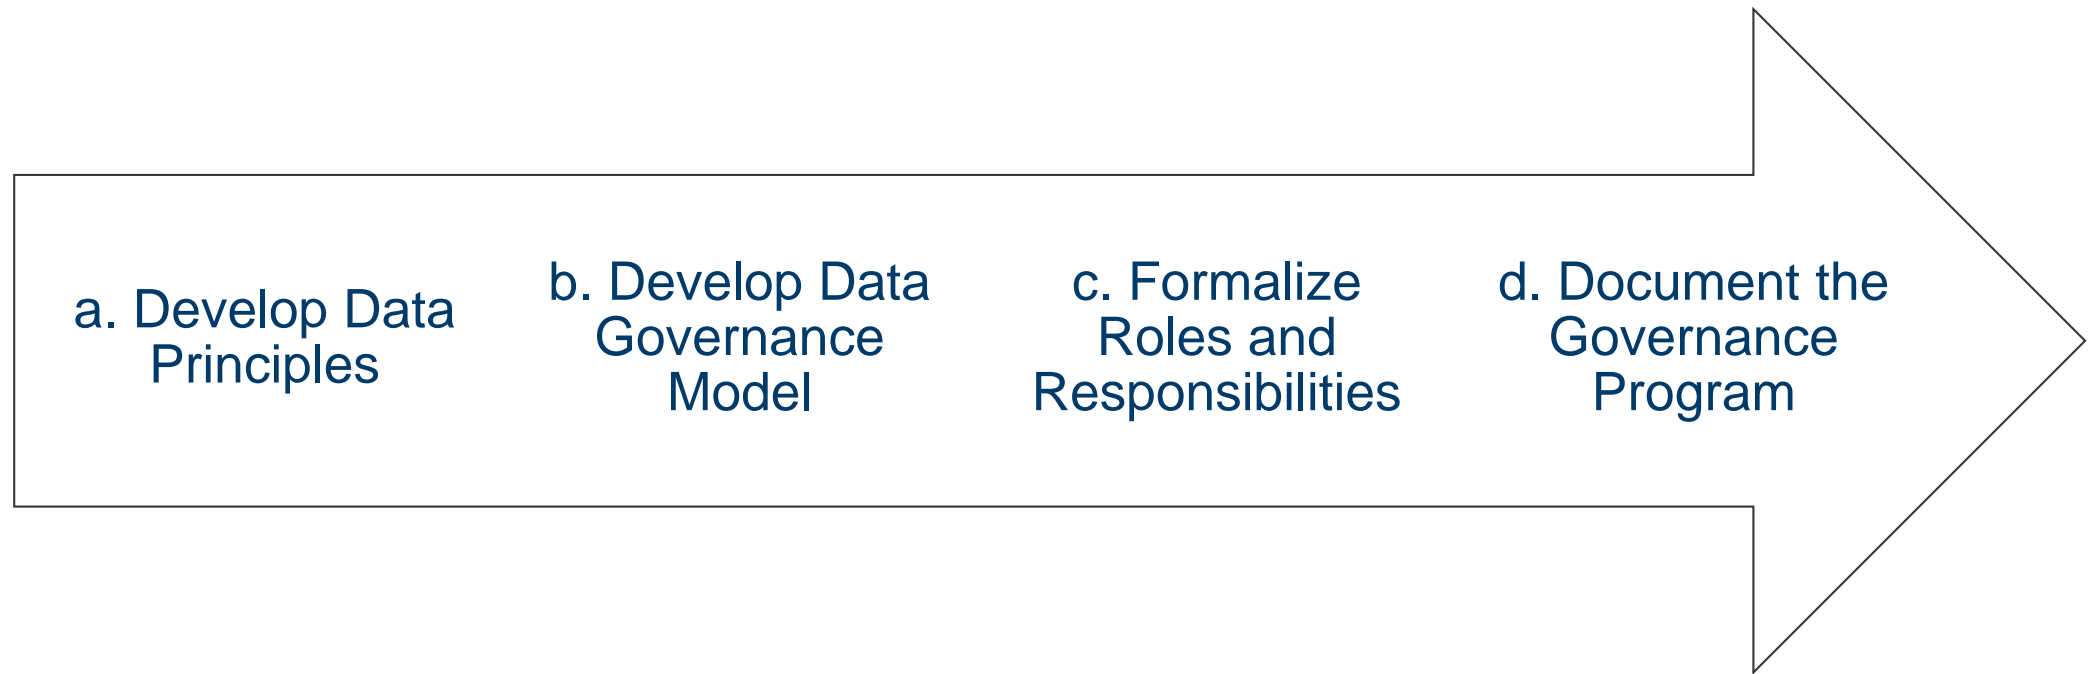

Identify Priorities

Prioritize strategies to identify most critical needs:

- **Low Priority:** Investment and benefit does not add significant value
- **Medium Priority:** Implement as time and investment permits
- **High Priority:** Implement as soon as possible, as these strategies significantly improve assessment area and gaps

Step 6. Data Governance Processes and Documents

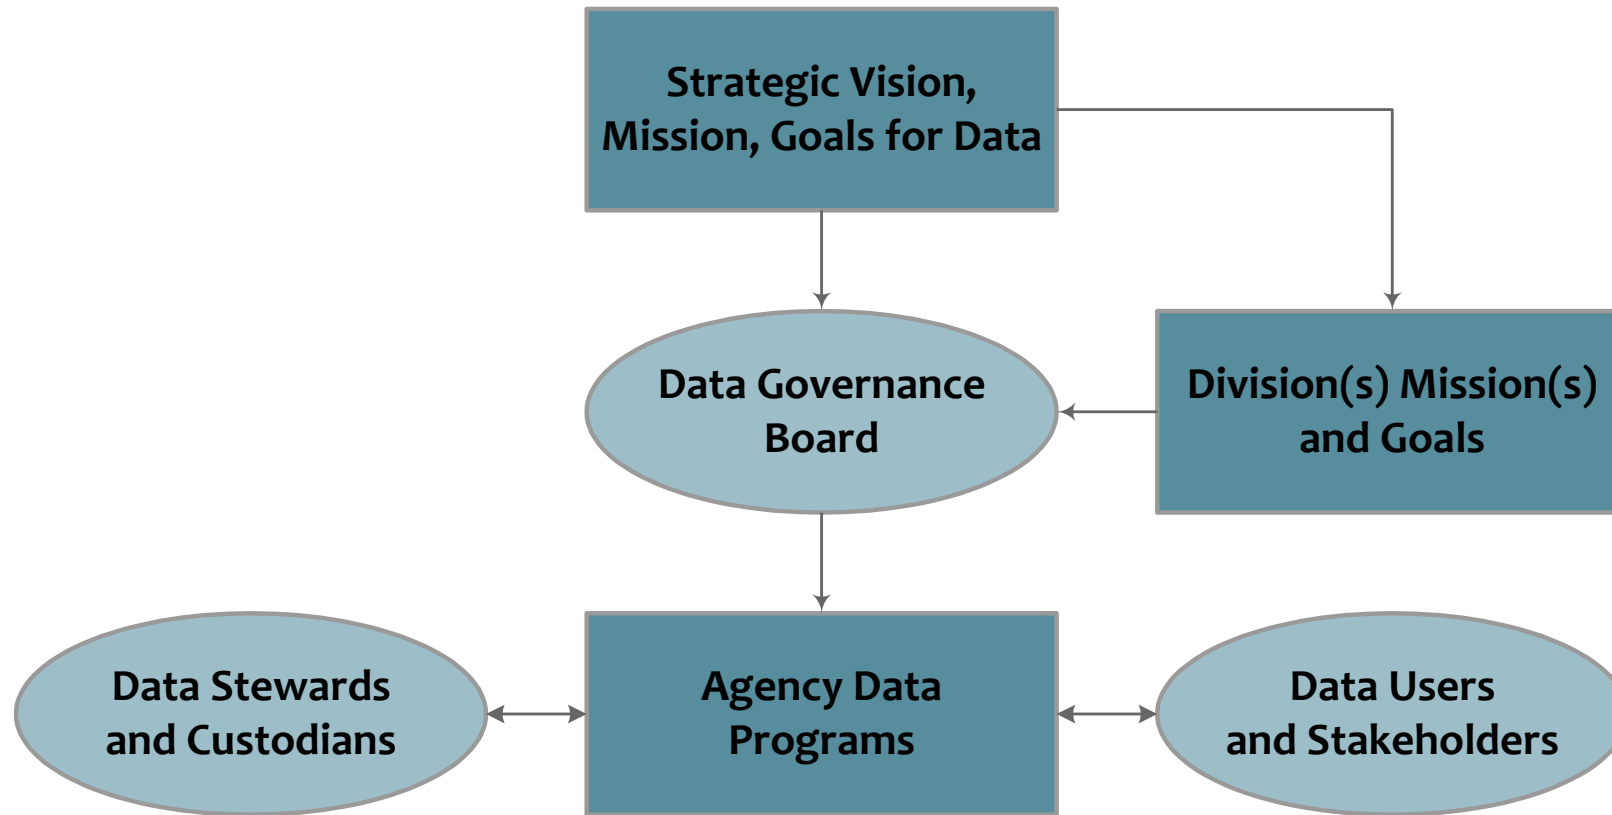

Step 6. Data Governance Processes and Documents

Step 6a. Develop Data Principles

- **Valuable:** Data is an asset
- **Available:** Data is open, accessible, transparent, and shared
- **Reliable:** Data quality and extent is fit for a variety of applications
- **Authorized:** Data is secure and compliant with regulations
- **Clear:** There is a common vocabulary and data definition
- **Efficient:** Data is not duplicated
- **Accountable:** Decisions maximize the benefit of data

Step 6b. Develop Data Governance Model

Source: Federal Highway Administration, FHWA-HOP-18-009

Step 6c. Data Governance Roles

Role	Description
Data Governance Council	Senior level managers who establish policies for data management
Data Stewards	Ensure data is collected, managed, and used in accordance with policies
Data Business Owners	Establish business requirements for use of data
Data Custodians	Provide IT support for data systems
Working Groups	Research technical issues and provide recommendations to the Board
Community of Interest	Stakeholders who share a common interest as users of data systems

Step 6d. Develop Documentation

Data Governance Manual

- Documents policies, standards, roles and responsibilities for data management

Data Catalog

- Documents data systems and offices responsible for maintaining those systems

Business Terms Glossary

- Defines commonly used business terms

Step 7. Data Management Practices

Step 7. Data Management Practices

- Implement data management policies and procedures for data collection, processing, analysis, and integration.

Management

Step 8. Develop Implementation Roadmap

Step 8. Develop Implementation Roadmap

Step 1: Execute a Memorandum of Understanding

- Execute MOU to engage regional stakeholder agencies in the DBP implementation process

Step 2: Obtain Regional Coordination and Buy-in

- Identify stakeholders
- Implement data governance framework
- Develop and publish a data catalog
- Conduct annual review of mobility data programs
- Develop vendor contract language to enable data sharing

Step 3: Improve Data Integration and Collaboration

- Address needs for data standards
- Address data security and privacy issues

Step 4: Build a Data Sharing Platform

- Post all data in Open Data Format
- Develop Data Governance Manual
- Address data collection and integration
- Develop a data warehouse
- Extend/leverage Waze data

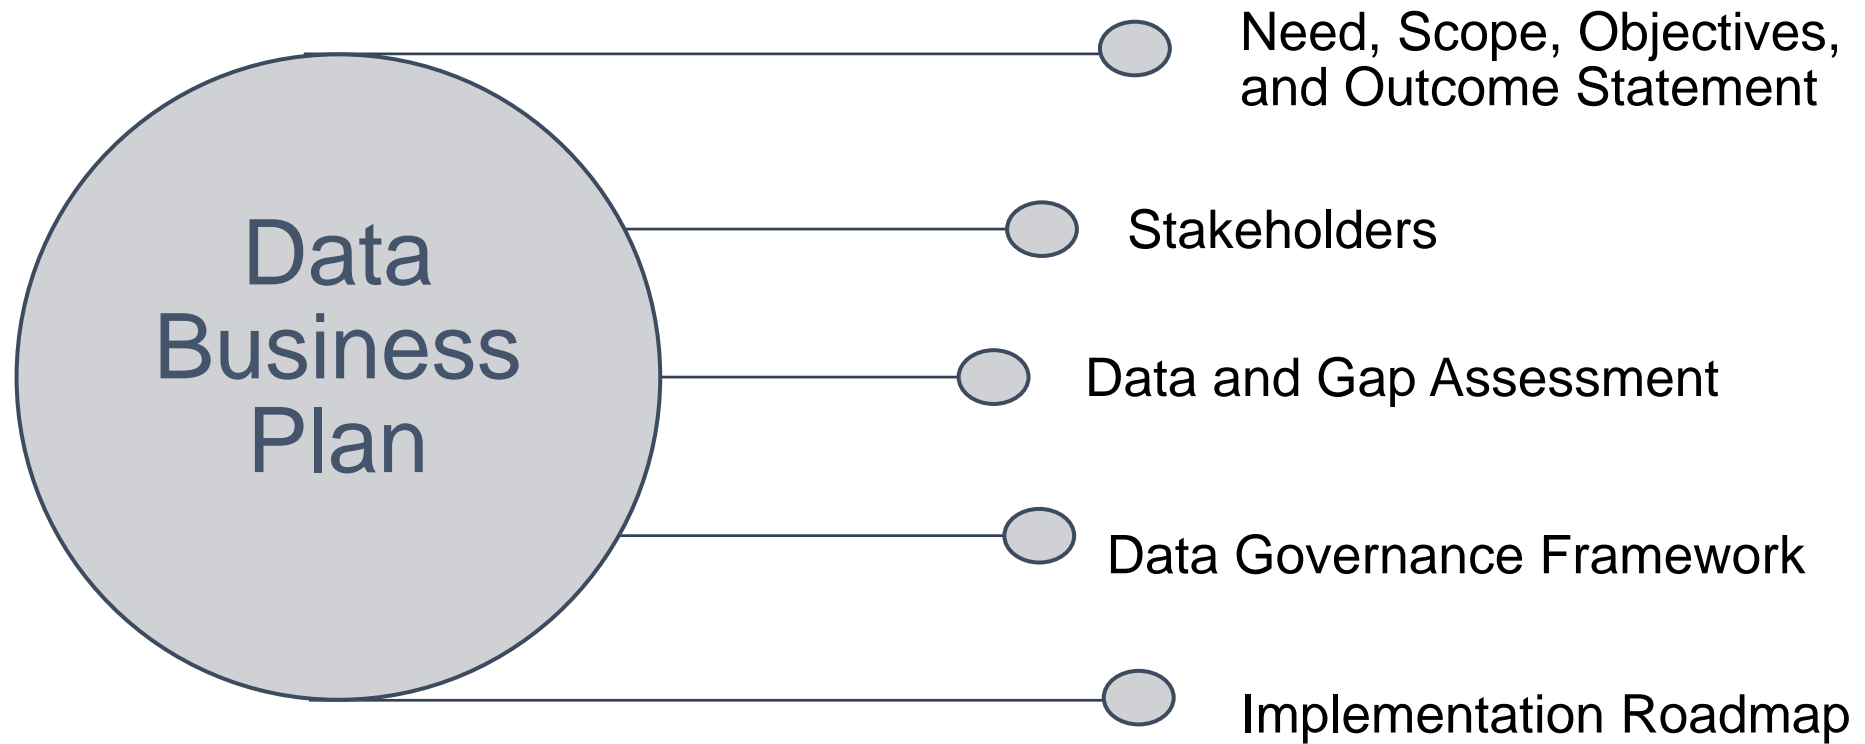

Step 5: Implement Performance Measure to Track Success

- Adopt performance measures
- Document measures in Data Governance Manual
- Develop plan for monitoring program activities

Step 9. Develop Data Business Plan

Step 9. Develop Data Business Plan

Objectives: At a Glance

- Present FHWA's approach for the Mobility Data Business Plan
- Raise awareness of the benefits of coordinated mobility data management and planning
- Assist in the development of a high-level approaches for Regional Data Sharing Frameworks
- Support the collaborative development of a Regional Data Business Plan that will enable regional data coordination and sharing
- Create data governance framework
- Identify the needs of the region
- Help position regions to better adopt emerging data, including trajectory data

Outcomes: At a Glance

- Heightened awareness of benefits derived from the implementation of the Mobility Data Coordination Group
- Demonstrated how data management can be enhanced to support Transportation System Management and Operations (TSMO) Plan
- Increased awareness of existing efforts in data collection and management in the regions
- Joint understanding of preliminary approach and the development of schedules for Regional Mobility Data Business Plans
- Agreements on need for Regional Data Sharing Frameworks

Outcomes: At a Glance (Cont.)

- Agreements on need for a Data Governance Framework
- Established Regional Data Coordination Committees
- Listed action items for next steps – with assigned responsibilities and timeframes
- Agreements on need for Regional Data Sharing initiatives
- Consideration to pooled fund resources for Regional Data Scientist positions
- Documentations of workshops to share with others

Workshops conducted throughout the country

The current phase of this effort is a series of workshops to:

- Raise Awareness about the benefits of data business planning
- Help spur regional collaboration
- Advance technical ability of workshop participants

State and Local Workshops - At a Glance

Workshops conducted:

- Atlanta Regional Council (ARC)
- San Diego Association of Governments (SANDAG)
- Nevada DOT
- Wichita Area Metropolitan Planning Organization -WAMPO (Kansas)
- KDOT
- Maricopa Association of Governments – MAG (Phoenix Area)
- Buffalo – Niagara Area

Beneficiaries of workshops conducted to-date

Atlanta Regional Council (ARC) - May 14, 2019

Invitees (6)

- ARC
- Georgia Department of Transportation (GDOT)
- City of Atlanta
- Georgia Regional Transportation Authority (GRTA)/State Road and Toll Authority (SRTA)
- FHWA Georgia Division
- Georgia Institute of Technology
- Supporting consultants

Beneficiaries of workshops conducted to-date

San Diego Association of Governments (SANDAG) - Nov 21, 2019

Invitee (1)

- SANDAG

Key takeaways from FHWA DBP Pilots include:

- Program Manager is key – someone to coach, influence others, work with change in management, identify bottlenecks and resolve them
- Setting goals is critical
- Don't neglect vital yet less “flashy” initiatives: developing a data catalogue, establishing standards, determining naming conventions, mapping data roles for each dataset

Beneficiaries of workshops conducted to-date

Nevada DOT (NDOT) - February 17, 2020

Invitees (5)

- Nevada DOT
- Regional Transportation Commissions (RTC) North
- RTC South
- FHWA Nevada Division
- Supporting consultants

Beneficiaries of workshops conducted to-date

Wichita Area MPO (WAMPO) – Oct. 6 and Oct. 27, 2020

Invitees (6)

- WAMPO
- KDOT
- City of Wichita
- City of Derby
- City of Haysville
- FHWA Kansas Division

Beneficiaries of workshops conducted to-date

Kansas DOT (KDOT) - November 2, 2020

Invitees and Challenges

- Attendees:
 - KDOT Central Office
 - KDOT Local District offices
- Challenges:
 - Data Governance initiatives started but didn't get traction
 - Staff turnover
 - Data collection techniques not up-to-date
 - Need for good data analysis knowhow

Beneficiaries of workshops conducted to-date

Maricopa Association of Governments (MAG) - Dec 10, 2020

Invitees (6)

- MAG staff
- Members of multiple transportation technical committees of MAG and MAG Public Universities Task Force
- FHWA Arizona Division
- Arizona DOT
- Maricopa County DOT
- Valley Metro

Beneficiaries of workshops conducted to-date

Buffalo – Niagara Workshop - March 19 and 26, 2021

Invitees (16)

- Greater Buffalo-Niagara Regional Transportation Council (GBNRTC)
- Niagara International Transportation Technology Coalition (NITTEC)
- New York State DOT (Albany Office and Region 5)
- New York State Thruway Authority
- Erie County
- Niagara County
- City of Buffalo
- City of Niagara Falls

Beneficiaries of workshops conducted to-date

Buffalo – Niagara Workshop Invitees (Cont.)

- Town of Amherst
- Town of Cheektowaga
- Town of Tonawanda
- Niagara Frontier Transportation Authority
- Ministry of Transportation of Ontario
- Niagara Falls Bridge Commission
- Peace Bridge Authority
- University at Buffalo
